Ionic CSS Components

- Ionic introduces a number of CSS classes that enable creation of various UI components
 - Similar to Bootstrap's approach
- CSS classes can be applied to many of the HTML elements
- Ionic's CSS classes can be used independent of the Ionic Angular directives
- Ionic use SASS to define the CSS classes
 - Can be customized by editing SASS

Ionic Card Class

```
<div class="card">
  <div class="item item-divider">
    Our Lipsmacking Culinary Creations
    <span class="badge badge-assertive">{{dish.label}}</span>
  </div>
  <div class="item item-thumbnail-left item-text-wrap">
    
    <h2>{{dish.name}} <span class="badge">
      {{dish.price | currency}}</span></h2>
    <p>{{dish.description}}</p>
  </div>
</div>
```

Exercise: Exploring Ionic Part 1

- Set up the controllers, services and communicating with the server to enable the construction of an Ionic app
- Design templates for the Ionic app using Ionic's Angular directives
